Workforce Needs Assessment

IOWA WORKFORCE DEVELOPMENT

The Iowa Needs Assessment Survey was made possible by funding from the Iowa Legislature.

Statewide

lowa Workforce Development conducted the fourth annual Workforce Needs Assessment from August 2012 through December 2012. In addition to vacancy and retirement data, this year's survey included questions pertaining to average hourly starting wage and enhanced emphasis on fringe benefits. Analysis of the survey illustrates the demand for workers and skills required in the workforce. This information can be used by economic developers, government leaders, educators and state agencies to guide their decision making on issues related to workforce development, vocational training and employee recruitment programs.

Beginning in August 2012, 33,095 employers in the state of Iowa were contacted and asked to complete the survey. Three attempts were made to contact each employer. By the end of the survey period (December 15, 2012), the survey had received 6,251 responses, yielding a 18.9 percent response rate.

Throughout this report, estimates and data are given by industry and by occupational category. Industry groups are developed around a specific product and employ many different occupations. Occupational categories are focused on the actual tasks done by a worker. The two formats are given to satisfy different end users of the data. Industry groups are of particular importance to economic developers and policy-makers. Occupational categories may be of more use to job seekers and educators.

Figure 1 details the survey respondents by industry, including the percentage of total current vacancies that are accounted for by each industry in the state. Vacancies are classified as current if they are, or will become, available within 12 months of the survey date.

These estimates are only valid if it is assumed that the vacancy rate for survey respondents and nonrespondents is the same on average. The vacancy rate may be lower among non-respondents, as businesses that do not have current vacancies may be less likely to respond to the Workforce Needs Assessment Survey.

Industry	Percent of Respondents	Percent of Total Vacancies Reported	Estimated Vacancies
Healthcare & Social Services	12.4%	24.3%	6,750
Manufacturing	9.3%	17.6%	4,903
Wholesale & Retail Trade	19.5%	9.5%	2,652

Figure 1 Survey Respondents by Industry and Percentage of Current Vacancies

*totals may vary due to rounding methods

Figure 2 (next page) shows estimated vacancies by occupational category. By breaking the data into separate occupational groups, we can see the majority of vacancies are within the production, personal care & service, office & administrative support and food preparation & serving related occupational categories, likewise, the highest number of vacancies by industry are in the healthcare and manufacturing industries. The occupational categories are clustered using the Standard Occupational Classification (SOC) system. Each broad category includes detailed occupations requiring similar job duties, skills, education or experience.

Occupational Category	Percent of Total Vacancies Reported	Estimated Vacancies
Production	13.9%	3,870
Personal Care & Service	10.3%	2,870
Office & Administrative Support	9.9%	2,758
Food Preparation & Serving Related	8.5%	2,372
Transportation & Material Moving	8.5%	2,351
Healthcare Practitioner & Technical	6.6%	1,837
Construction & Extraction	6.4%	1,779
Healthcare Support	6.0%	1,678

Life, Physical & Social Science	0.4%	116
Legal	0.4%	101
Total	100%	27,816

Figure 2 Percentage of Current Vacancies by Occupational Category

*totals may vary due to rounding methods

Of the survey respondents, 1,578 (25.2%) reported having one or more current or anticipated job vacancies, while 4,672 respondents (74.8%) reported having no job vacancies. A total of 5,254 current job vacancies were reported for the State of Iowa, consisting of 63.7 percent full-time, 29.4 percent part-time and 6.9 percent seasonal or temporary positions. When asked why positions are currently vacant, employers responded as follows:

- 30.6% Permanent business growth/expansion
- 9.4% Seasonal business growth/expansion
- 4.6% Replacing retiring employee
- 55.4% Replacing worker who has left (not retired)

Figure 3 shows the breakdown of job vacancies by employer size. Of employers that responded with job vacancies, 45.8 percent were businesses with 10 or fewer employees, 49.1 percent had between 11 and 99 employees and 5.1 percent had 100 employees or more. Figure 3 shows the distribution of reported job vacancies by employer size. The response rate for each employer size category is shown next to the respective percentage share of reported job vacancies. While large employers only accounted for 5.1 percent of the survey responses, they reported over one-fourth (26.6%) of the total job vacancies in the State of Iowa.

One measure of workforce demand is determined by the job vacancy rate. With an estimated 27,822 job vacancies and a statewide employment total of 1,444,051¹, there is a 1.9 percent vacancy rate or approximately two jobs available for every 100 filled positions. A low vacancy rate indicates a lack of jobs while a high vacancy rate may indicate a shortage of qualified workers or simply an industry with a high employee turnover. Conversely, a low vacancy rate may indicate contraction within the industry, an

Figure 4				
Vacancy Rate by Industry				

Industry	Statewide Employment ¹	Vacancy Rate
Construction	62,881	3.3%
Healthcare & Social Services	207,514	3.3%
Professional & Technical Services	42,637	2.6%
Accommodation & Food Services	107,108	2.3%
Manufacturing	211,325	2.3%
Administrative & Waste Services	68,295	2.2%
Transportation & Warehousing	55,542	2.0%
Personal Services	42,636	1.9%
Arts, Entertainment & Recreation	20,526	1.7%
Finance, Insurance & Real Estate	99,997	1.7%
Information	27,879	1.4%
Public Administration	64,912	1.4%
Utilities	8,039	1.4%
Agriculture & Mining	18,167	1.3%
Management	15,657	1.1%
Wholesale & Retail Trade	245,232	1.1%
Educational Services	145,704	0.3%

oversupply of workers, or lower than average turnover. It should be noted that many states do not use the same methods when calculating job vacancy rates and many states do not perform such calculations annually.

It is important to note the difference between the number of vacant positions and the vacancy rate. An industry may have a low vacancy rate but have many vacant positions. This is because, when compared to their total workforce, the number of vacant positions is small in comparison.

Figure 4 shows the vacancy rate and how many jobs are available per 100 filled positions by industry. The industries within the state with the highest vacancy rates are construction (3.3%), healthcare & social services (3.3%) and professional & technical services (2.6%). These industries currently have relatively more vacant positions when compared to the size of their workforce. When looking at vacancy rates, it is important to understand the various reasons an industry might have many vacant positions open relative to their total staff.

Figure 5 breaks down the vacancy rate by occupational category. The categories with the highest vacancy rates are personal care & service (7.8%); healthcare support (3.7%); and architecture & engineering (3.2%). The services and construction categories typically have high vacancy rates due to high employee turnover. Employers are constantly hiring for many of these positions, while the high vacancy rate for the healthcare category is usually attributed to growth in employment and lack of workforce. Total employment by occupational category may differ from total employment by industry because of confidentiality issues in employer surveys.

Occupational Category	Statewide	Vacancy
Occupational Category	Employment ²	Rate
Personal Care & Service	37,030	7.8%
Healthcare Support	45,030	3.7%
Architecture & Engineering	18,500	3.2%
Construction & Extraction	57,470	3.1%
Computer & Mathematical Science	28,510	2.6%
Farming, Fishing & Forestry	5,690	2.6%

Figure 5 Vacancy Rate by Occupational Category

¹Annual 2012 total statewide employment from Iowa Workforce Development

² lowa employment by occupational category computed from 2011-2012 lowa Local Employment Dynamics

Figure 6 presents the Hiring Demand Index (HDI)³ by occupational category. The HDI is another way of looking at the workforce needs within the economy. The vacancy rate shows us the overall demand for workers, but can be misleading because of employee turnover. To account for this, we adjust the vacancy rate by employee turnover to see which industries or jobs are in high demand, using the following equation:

(Industry Vacancy Rate + Avg. Vacancy Rate) + (Industry Turnover Rate + Avg. Turnover Rate)

Example: The farming, fishing & forestry occupational category has an above average vacancy rate of 2.6 percent, while the vacancy rate for all categories is 1.9 percent. This implies that the workers within the category have a greater hiring demand than workers in other occupational categories. However, the turnover rate for employees in this category (defined as how often the industry hires for the same job within a year) is also much higher than others. The category has a turnover rate of 32.6 percent, while the turnover rate for all occupations is 27.1 percent. The HDI for the farming, fishing & forestry occupational category, is calculated as follows:

$$(2.6\% \div 1.9\%) \div (32.6\% \div 27.1\%) = 1.12$$

Using the HDI, we can see that the hiring demand for the farming, fishing & forestry occupations is not as high as it may have previously appeared. Note, the vacancy rate is calculated as the total estimated vacancies over the total estimated employment within the state. Using the average of the vacancy rates in each occupational category would be inaccurate due to very high and very low rates and the lack of data in some categories.

A value of one is the average demand for all industries or occupations. A value greater than one means a higher demand for workers, while a value lower than one means a lower than average demand for workers.

By comparing the Hiring Demand Index with the vacancy rates of an occupational category, we can see in which occupations is there a real unmet need for workers. It is also in these occupations that employers will need to pay a higher wage to attract qualified workers. This analysis can be an important tool for economic developers, policy-makers, educators and job seekers.

Figure 6 Hiring Demand Index by Occupational Category

³The Hiring Demand Index (HDI) adjusts industry vacancy rates, from this survey, by industry employee turnover rates which are computed from 2011 lowa Local Employment Dynamics.

Requirements, Skills & Training

Employers were asked about the education/training and experience requirements of applicants for their reported job vacancies. The results for current job vacancies are shown below in **Figure 7** and **Figure 8**.

	Figure 7	
Education	Required - Current	Vacancies

Education Required	Percent
No Educational Requirement	20.1%
High School Education/GED	45.2%
Vocational/Technical Training	15.4%
Associate Degree	7.3%
Undergraduate Degree	9.3%
Postgraduate/Professional Degree	2.7%

Figure 8 Experience Required - Current Vacancies

Experience Required	Percent
No Experience Required	45.0%
Less than 1 Year	14.2%
1-2 Years	24.6%
3-5 Years	11.8%
More than 5 Years	4.4%

Employers were asked their perceptions on the degree to which job applicants possessed soft, basic and occupational skills. In addition, employers were asked if applicants, who may or may not possess the necessary skills for the job vacancy, were being disqualified due to the results of controlled substance testing or background checks. The results for all employers are shown below in **Figure 9**.

We can begin to analyze any workforce gaps by comparing the inventory of skills needed by employers and those skills held by the population of workers as presented in a Laborshed analysis. This gap is then analyzed and the necessary training and education programs can be formalized through a Skillshed study.

Figure 9 Perception of Applicants

Employer's Perceptions of Job Applicants	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
In general, applicants fulfill all necessary requirements for the job.	13.7%	34.0%	32.8%	14.4%	5.2%
In general, applicants possess the basic skills required for the job.	14.7%	41.3%	30.9%	10.4%	2.6%
In general, applicants possess the soft skills required for the job.	8.1%	32.6%	38.8%	16.3%	4.2%
In general, applicants possess the occupational skills required for the job.	9.2%	29.8%	34.3%	19.9%	6.7%
There is often a problem filling this position because applicants are disqualified due to controlled substance testing.	3.0%	6.1%	27.6%	18.9%	44.4%
There is often a problem filling this position because applicants are disqualified for failure to pass a background check.	5.0%	9.1%	28.4%	22.7%	34.7%

Figures 10, 11 and 12 break down basic, soft and occupational skills that employers reported were lacking by applicants to fill open positions.

Basic skills are those skills developed during the elementary and middle part of an individual's education. These skills include literacy, numeracy (the ability to do arithmetic and reason with numbers), basic computer skills and organization. Over one-tenth (13.0%) of employers surveyed feel that applicants lack basic skills needed for the job. The Skilled Iowa initiative provides a means to benchmark and certify applicant's skills in Applied Mathematics, Reading for Information and Locating Information through the National Career Readiness Certificate testing program. More information on Skilled Iowa can be found at www.skillediowa.org.

Soft skills refer to skills associated with an individual's habits, personality and character. Soft skills include timeliness, responsibility, integrity and self-esteem. Also included are interpersonal skills such as leadership ability, customer service and teamwork. Individuals with strong soft skills are better suited for working within an organization, as well as with customers and, therefore, are valued by employers. More than one-fifth (20.5%) of employers surveyed feel that applicants lack soft skills needed for the job.

Figure 11 Soft Skills Lacked by Applicants

 $0.0\% \quad 10.0\% \quad 20.0\% \quad 30.0\% \quad 40.0\% \quad 50.0\% \quad 60.0\% \quad 70.0\% \quad 80.0\%$

Figure 12 Occupational Skills Lacked by Applicants

Occupational skills are the technical and know-how skills that apply directly to a job. Occupational skills are often referred to as "hard skills" and are primarily job-specific. In general, occupational skills include analytical skills, managerial ability, physical ability, knowledgeable and experience. The exact meaning behind these skills varies, depending on the job in question. Over one-fourth (26.6%) of employers surveyed feel that applicants lack occupational skills needed for the job.

In the event that current or newly hired employees are lacking the soft, basic and occupational skills necessary to fill current job vacancies, employers were asked where they send employees to upgrade these skills. These results are listed in **Figure 13**.

Figure 13			
Where Additional Training is Offered			

Training Provider	Percent
In-house training	51.8%
Commercial training provider	22.7%
Online	20.0%
Employee self-directed training	19.0%
No training provided	13.8%
College/University	10.3%
Trade school	9.2%
Other	8.7%

Figure 13 indicates where employers are sending their employees for training to satisfy job requirements. When training is provided, most employers are currently using in-house training or commercial training providers. Almost all (88.7%) of employers report taking employee input under consideration when planning what training to provide. More than onefourth (26.1%) of employers also expressed an interest in working more closely with local education providers to implement training programs. The time span from when a job vacancy becomes available to the time it is filled is referred to as the recruitment period. **Figure 14** details the recruitment periods reported by employers within the State of lowa.

Figure 14 Recruitment Period for Current Vacancies

Figure 15 Recruitment Media Utilization

Employers who have a clear understanding of the job search resources used by workers in their respective industry will maximize their effectiveness and efficiency in attracting qualified applicants. Understanding and utilizing traditional and non-traditional advertising media will provide employers with a more focused and effective recruitment tool. Residents living in the state are exposed to numerous sources by which employers communicate job openings and new hiring. Therefore, it is important to understand what sources potential workers rely on when looking for jobs in the area.

Figure 15 details employer media use for recruitment purposes versus the media use of those looking for employment opportunities.

Employers utilized a variety of media to recruit potential employees. Respondents indicated that the most useful media outlets were networking/word of mouth, followed by print editions of local and regional newspapers, the internet, electronic editions of local/regional newspapers, local IowaWORKS centers, college/university career centers and social media.

Potential employees, on the other hand, were most likely to go first to the internet, followed by local/regional newspapers, networking/word of mouth, local lowaWORKS centers and private employment agencies when looking for jobs.

These mismatches in advertising versus search media usage can increase recruitment time periods and cost. More information on job search media usage can be found in the Statewide Laborshed Report (<u>http://www.iowaworkforce.org/lmi/labsur/iowa_statewide_laborshed_2012.pdf</u>).

Figure 16 Average Wages by Occupational Category

Figure 16 is the 2012 survey-reported average starting wages by occupational category with 2011 surveyreported average starting wages for comparison. This is important for job seekers in determining what jobs can provide a livable wage and have higher earning potential. Employers can use the information to determine their competitiveness with wages among all other categories. From the graph, we see that the computer & mathematical science; management; architecture & engineering; and life, physical & social science occupational categories pay the highest average starting wages. **Appendix A** (page 19) shows occupations in management; architecture & engineering; computer & mathematical science; business & financial operations; and healthcare practitioner & technical categories provide the highest entry level wages. More wage information including a comparison between average occupational wages to statewide average entry level wages and statewide average hourly wages can be found in **Appendix A**.

Benefits Offered

Employers may also use benefits to attract potential employees. Employers were asked about the types of benefits being offered for their current full time and part time job vacancies. These results are shown in **Figures 17, 18 & 19**.

Insurance Benefits Offered	Full Time Positions	Part-Time Positions
Health/Medical	89.1%	10.4%
Prescription Drug Plans	74.6%	9.5%
Life Insurance	62.5%	10.3%
Dental	57.0%	10.4%
Accidental Death & Dismemberment	49.6%	7.8%
Long Term Disability	43.3%	7.2%
Short-Term Disability	41.9%	7.6%
Vision	32.6%	6.4%

Figure 17 Insurance Benefits Offered by Employers

Paid leave is another common form of employee benefit. Holiday leave varies by company in both the number of days and the particular holidays recognized. Some employers may also offer increased holiday pay in lieu of time off. Similarly, the specifics of maternity/paternity leave programs vary widely among different employers. Combined paid time off (PTO) refers to programs that allow employees to accumulate paid time off in a single pool to be used for either vacation or sick leave versus situations in which employees accrue time in separate pools.

Figure 19 Other Benefits Offered by Employers

Other Benefits Offered	Full Time Positions	Part-Time Positions
Bonuses	66.6%	36.7%
Company Vehicle	61.7%	34.0%
Retirement Package	50.7%	21.0%
Flex Spending Accounts/Cafeteria Plans	44.7%	15.0%
Uniform Allowances	37.7%	18.3%
Tuition Assistance	29.7%	11.6%
Profit Sharing/Stock Options	23.4%	9.4%
Employee Assistance Program	20.7%	13.6%
Wellness Programs	17.5%	11.1%
Shift Differential Pay	16.1%	10.6%
Relocation/Moving Expenses	11.4%	1.4%
Childcare	3.4%	1.6%

Insurance is a common benefit offered by employers. Different types of health care insurance (vision, dental, etc.) may be offered as part of an umbrella plan. Respondents were asked to indicate those separately if included in a combined package. Employers were not asked about workers compensation insurance as that program is intended to cover employer liability and not employee needs directly.

Figure 18
Paid Leave Benefits Offered by Employers

Paid Leave Benefits Offered	Full Time Positions	Part-Time Positions
Holiday	89.5%	31.1%
Vacation	84.5%	24.3%
Bereavement/Funeral	73.5%	26.0%
Sick Leave	58.5%	17.9%
Personal Days/Floating Holidays	47.8%	15.0%
Combined Paid Time Off (PTO)	47.6%	16.5%
Maternity/Paternity	46.5%	15.9%
Training	42.3%	16.8%

In addition to insurance and paid leave employers offer a range of other benefits. Bonuses are common and are offered on a wide range of criteria including individual performance incentives, longevity awards and company-wide success. Company vehicle benefits include mileage reimbursement for the use of employee owned vehicles. Retirement packages may be either defined benefit (traditional pensions) or defined contribution (401K). Depending on the type of retirement package payments may or may not include either employer or employee matching contributions. Childcare benefits include both reimbursement programs and on-site facilities.

The Statewide Laborshed Analysis was used to identify current benefit packages being offered to employees within the state. These benefits include; health/medical insurance (90.4%), pension/retirement options (69.0%), dental coverage (54.0%), paid vacation (45.5%), vision coverage (33.4%), life insurance (29.0%), paid sick leave (27.8%), paid holidays (25.9%), disability insurance (18.4%), prescription drug coverage (8.7%) and paid time off (7.4%). Over three-quarters (76.8%) of the employers and employees are reported as sharing in the premium costs of health/medical insurance, 15.3 percent of the employers are reported as covering the entire cost of insurance premiums while 7.9 percent of the employers/employees have made other arrangements.

Future Plans

Employers were asked a series of questions about their plans for future payroll changes. They were asked whether they planned on increasing or decreasing the number of workers on payroll or if they planned to keep their workforce at its current strength, timeframe for the change, reasons for the change and jobs that would be affected by the change.

When analyzing reported workforce changes, it is important to note not only the specific reasons provided by employers but also the business and economic environment during which the employers were surveyed. Because of the great uncertainty surrounding the near-term economic health of the state, many employers were not able to state their workforce plans in any definite way.

Figure 20 Future Workforce Plans

Figure 20 shows the proportion of employers planning to expand, reduce or maintain the size of their workforce. Almost three-fourths (74.6%) of employers are planning to keep the size of their workforce steady while 21.8 percent of employers plan to expand their workforce and only 3.7 percent plan to reduce their workforce.

Figure 21 Net Reported Payroll Change

Figure 21 The Net Reported Payroll Change map shows the relative intensity of plans by employers to expand or reduce their workforces in each county in terms of total jobs to be created or cut, normalized by the total employment of the county. The darker red indicates greater expected reductions, relative to local employment, while the darker blue indicates counties in which employers plan to expand most heavily, relative to local employment. Counties in white indicate a net-zero or no response. Separate maps of expansion and reduction can be found in **Appendix B**.

Planned Workforce Expansion

Over one-fifth (21.8%) of the employers surveyed are planning to expand their workforce in the future. Of those employers planning on expanding their workforce, 52.3 percent indicated they were planning to do within 12 months, 33.7 percent indicated that they were planning to expand in one to two years, 10.0 percent are planning to expand in two to three years and 4.0 percent plan to expand in more than three years. Two-fifths (40.0%) of the companies planning to expand would be interested in working with a local education provider to set up a program for training/educating potential employees to fill these needs.

Figure 22 Reasons for Payroll Expansion Ranked by Relative Importance

Reasons for Expansion
Increase share of existing market
Meet current market demands
Entry into new markets
Opening a new location
Insourcing of business operations
Reduction of overtime
Merger/Acquisition
Changes in tax or regulatory incentives

Respondents were asked to rank, in order of significance, possible reasons for expanding, maintaining or reducing the size of their workforce. **Figures 22**, **23** and **27** (on page 13) show the average importance of reasons for each case.

Figure 22 compares employers' stated reasons for planning to increase the size of their workforce. The reasons indicated as being of the greatest importance in deciding to expand include plans to increase their share of existing markets, meeting current market demands and entering new markets. Common other reasons include planning for future retirements and anticipation of future increases in demand.

Figure 23 Constraints Preventing Payroll Expansion Ranked by Relative Importance

Figure 23 compares employers' stated constraints to increasing the size of their workforce. The reasons indicated as being of the greatest importance in preventing the expansion of workforces include marginal cost of additional labor, increases in cost of benefits and uncertainty in current or expected market demands. Common other constraints include declining public funding and improvements in technology that reduce the need for additional workers.

Impediments for Expansion
Cost of additional labor
Expense related to benefits
Uncertainty in current market demands
Competition within existing markets
Tax or regulatory issues
Lack of available skilled workforce
No desire to expand
Limited access to capital
Barriers to entering new markets
Insufficient space at current location/inability to find appropriate new location
Supply chain limitations
Planned merger/acquisition or business sale/transfer
Dont know steps/processes needed to expand

Figure 24 Planned Payroll Expansion

Figure 24 shows those employers who are planning to expand by industry. The "Percent of Each Industry" column shows what percentage of employers in each industry is planning to expand their payroll. The "Percent of Total" column shows what percentage of all businesses planning to expand their payroll is accounted for by each industry. For example, 20.1 percent of all businesses in the wholesale & retail trade industry are planning to expand their payroll in the future. Those businesses within the wholesale & retail trade industry make up 18.1 percent of all the businesses in the survey that are planning to expand their payrolls in the future.

Figure 25 Timing of Planned Expansion

Estimated Time for Expansion	Percent of Respondents
Within 12 months	52.3%
1-2 years	33.7%
2-3 years	10.0%
More than 3 years	4.0%

Figure 26 shows the percent of planned expansion by occupational category. Office & administrative support represents one of the largest categories among current vacancies (Figure 2, page 2) and the category accounts for 9.9 percent of the planned payroll expansion positions. Production related occupations, on the other hand, represent 13.9 percent of current vacancies and employers planning to expand their payrolls indicated they plan on increasing payroll most frequently within this category. The occupational categories that will be most affected are: production; food preparation & serving related; office & administrative support; construction & extraction; and transportation & material moving.

Figure 25 shows the timeframe for those employers who are planning to expand their payrolls.

Figure 26 Planned Payroll Expansion by Occupational Category

Occupational Category	Percent of Planned Expansion
Production	22.5%
Food Preparation & Serving Related	10.3%
Office & Administrative Support	9.9%
Construction & Extraction	8.6%
Transportation & Material Moving	6.5%
Sales & Related	5.5%
Personal Care & Service	5.3%
Installation, Maintenance & Repair	4.9%
Farming, Fishing & Forestry	4.5%
Healthcare Practitioner & Technical	3.5%
Building & Grounds Cleaning & Maintenance	2.6%

Education, Training & Library	1.2%
Community & Social Science	0.8%
Protective Service	0.8%
Arts, Design, Entertainment, Sports & Related	0.6%
Legal	0.5%
Life, Physical & Social Science	0.4%

Planned Workforce Reduction

Very few (3.7%) of the employers surveyed are planning to reduce their workforce in the future. Of those employers planning on reducing their workforce, 72.4 percent indicated they were planning to do so within 12 months, 17.8 percent indicated that they were planning to downsize in 1 to 2 years, 6.1 percent are planning to downsize in 2 to 3 years and 3.7 percent plan to reduce the size of their workforce in more than three years. More than one-fifth (21.8%) of the companies planning to downsize would be interested in working with a local education provider to set up programs to train/educate employees to transition to new jobs.

Figure 27 Reasons for Workforce Downsizing Ranked by Relative Importance

Figure 27 compares employer's stated reasons for planning to reduce the size of their workforce. The reasons indicated as being of greatest importance in deciding to reduce the size of workforces include reduced profits from current operations, expenses related to employee benefits, changes in tax or regulatory burdens, or responding to reduced market demand. Commonly cited other reasons for companies reducing their workforce include productivity improvements in technology and reduced public funding.

Reasons for Downsizing
Reduced profits from current operations
Expenses related to benefits
Changes in tax or regulatory burdens
Respond to reduced market demands
Reduced share of existing market
Business sale or closure
Exit from existing markets or business division closing
Closing an existing location
Outsourcing of business operations

The middle column in **Figure 28**, "Percent of Each Industry," shows what percentage of each industry is planning to reduce their payroll in the future. The far right column, "Percent of Total," shows what percentage of all businesses planning to reduce their payroll is accounted for by each industry. For example, 3.1 percent of all businesses in the wholesale & retail trade industry are planning to reduce their payroll in the future. Those businesses within the wholesale & retail trade industry make up 16.6 percent of all the businesses in the survey that are planning to reduce their payrolls in the future.

Notes:

Retirement

Currently, there are 66,586 individuals over the age of 64 working throughout the State of Iowa. They represent approximately 4.6 percent of the total workforce. The agriculture & mining (13.0%); finance, insurance & real estate (11.4%); and wholesale & retail trade (11.4%) industries have the highest percentage of their workforce over the age of 64. There are more males than females in this portion of the workforce, with 51.2 and 48.8 percent respectively⁴.

Of those employees eligible to retire, almost all (93.7%) of them meet the current skill requirements of the positions they occupy. It's also notable that retirement eligibility requirements do vary by employer and industry.

While the number of retirees can be somewhat hard for employers to gauge as they look toward the future, **Figure 30** presents the annual estimated number of eligible retirees through 2016. Recognizing that some employees will not retire the year that they first become eligible, employers were asked not to double count employees who were eligible to retire in subsequent years. **Figure 30**

There are an estimated 12,473 employees already eligible to retire who have remained in their positions. These retirement-eligible employees may be choosing to remain in the workforce due to their employer's retention efforts or due to personal reasons. According to the survey, an average of 0.7 percent of the State of Iowa's workforce becomes eligible for retirement each year (10,431 divided by total employment of about 1,444,051 workers). Future analysis of trend data will help us understand how many retirement eligible workers are remaining in the workforce and for how long.

The future year estimates in subsequent reports will reflect employees who did not retire in the year they actually were eligible as they may choose to continue their employment because of retention efforts by employers.

Figure 31 shows the estimated percentage of potential worker loss due to retirement by industry. In the next five years, there will be a significant number of workers eligible for retirement from the manufacturing; healthcare & social services; wholesale & retail trade; and finance insurance & real estate industries.

Retirement Eligibility by Industry				
Industry	Percent of Expected Retirements			
Manufacturing	17.9%			
Healthcare & Social Services	17.3%			
Wholesale & Retail Trade	13.3%			
Finance, Insurance & Real Estate	8.5%			
Educational Services	7.7%

Figure 31 Retirement Eligibility by Industry

⁴2011-2012 Iowa Local Employment Dynamics

Figure 32 Retirement Eligibility within each Occupational Category

	Percent Affected
Occupational Category	by Retirements
Office & Administrative Support	17.0%
Management	15.9%
Production	11.5%
Transportation & Material Moving	6.9%
Healthcare Practitioner & Technical	6.8%
Installation, Maintenance & Repair	6.4%
Sales & Related	5.8%
Education, Training & Library	5.5%
Business & Financial Operations	4.8%
Construction & Extraction	4.8%
Healthcare Support	2.5%
Personal Care & Service	2.0%
Building & Grounds Cleaning & Maintenance	1.9%
Architecture & Engineering	1.7%
Food Preparation & Serving Related	1.4%
Legal	1.2%
Community & Social Science	1.0%
Computer & Mathematical Science	1.0%
Protective Service	0.7%
Arts, Design, Entertainment, Sports & Related	0.5%
Farming, Fishing & Forestry	0.3%
Life, Physical & Social Science	0.3%

Figure 32 shows the percent of eligible retirement within each occupational category. Office & administrative support positions supported the third largest occupational category among current vacancies (9.9%) (Figure 2, page 2) and is the largest occupational category among jobs potentially affected by retiring workers. While personal care & service occupations make up 10.3 percent of the state's current vacancies (Figure 2, page 2), they are not significantly affected by workers potentially retiring (2.0%). The occupational categories that will potentially be the most affected are: office & administrative support; management; production; transportation & material moving; and healthcare practitioner & technical.

Nearly three-fourths (72.0%) of employers indicated that they are engaged in retiree retention efforts. **Figure 33** details employer responses regarding the strategies used to retain retirees. Nearly half (46.3%) of the employers are offering retirees flexible work schedules; followed by increased wages and/or bonuses; a change in duties/responsibilities; other or no efforts; additional training to upgrade their skills; more recognition for work done; seasonal work schedules; benefits to part-time employees; allowing telecommuting/working from home; and benefits to retirees.

Figure 34 How Companies Plan to Replace Those Who Retire

Replacing Vacancies Due to Retirements	Percent
Combination of hiring outside workers and promoting from within the company	40.8%
Hire workers from outside of the company	34.9%
Not currently planning to fill these positions	14.7%
Promote employees from within the company	9.7%

Figure 33 Retiree Retention Efforts by Employers

Efforts to Keep/Attract Retirees	Percent
Flexible work schedules	46.3%
Increase wages and/or bonuses	41.5%
Change in duties/responsibilites	29.4%
Offer additional training	25.7%
Other/none	20.4%
More recognition	18.2%
Benefits to part-time employees	13.4%
Seasonal work schedules	11.3%
Telecommuting/working from home	6.6%
Benefits to retirees	6.1%

Figure 34 shows how companies plan to fill vacant positions left behind from those who have retired. Of those who reported, 34.9 percent plan only to hire workers from outside the company, 40.8 percent plan to use a combination of hiring outside workers along with promoting from within the company, 14.7 percent do not currently plan on filling these positions and 9.7 percent plan on only promoting from within the company.

Conclusion

The Workforce Needs Assessment gives us an idea of the demand for workers within an industry. The survey shows a relative high demand in the healthcare, manufacturing and wholesale & retail trade industries. By occupational category the survey shows a relative high demand in the production, personal care & service and office & administrative support occupational categories.

Currently, the state has a large number of estimated job vacancies in healthcare related occupations (3,515), including health diagnosing, treating practitioners, nursing and home health-aide occupations. There is an additional demand for health technicians and technologists. Metal and plastic workers along with all types of production occupations represent 13.9 percent of the current openings across the state. Together, these occupational categories account for 26.6 percent of all reported job vacancies, signaling a large number of opportunities for students and workers in related industries.

Over four-fifths (88.0%) of the current job vacancies reportedly require an education level at or below an associates degree. Over one-tenth (12.0%) of current job vacancies require an undergraduate degree or higher. Over two-fifths (45.0%) of the current job vacancies reportedly require no experience, while 38.9 percent require experience totaling less than two years.

Vacancies due to upcoming retirements are showing, in total, slightly higher requirements than current job vacancies, where 35.5 percent of jobs will require a high school education, 17.1 percent will require technical training/certification and 24.3 percent will require an undergraduate degree. Job vacancies due to retirements will also require slightly more experience than current job vacancies, with 18.8 percent requiring no experience and 58.4 percent requiring experience totaling less than two years.

As a result of this survey, lowa will be able to identify the gap between the existing workforce, the skills it possesses and the existing needs of industries. Identifying this gap will allow lowa to assist community colleges, universities and other educational institutions in preparing upcoming workers with the necessary and appropriate skills to make them successful in the workforce.

This Workforce Needs Assessment Survey was conducted by Iowa Workforce Development's Regional Research & Analysis Bureau in partnership with the Iowa Association of Business and Industry and validated by the University of Northern Iowa's Institute for Decision Making.

Job Vacancies

The following section shows estimated vacancies for each reported job title utilizing data from the Workforce Needs Assessment Survey.

Appendix A

Average Statewide Starting Wages Compared to Statewide Entry Level & Statewide Average Hourly Wages

⁵Entry Level Wage and Average Wage taken from 2012 Iowa Wage Survey.

⁶Average Starting Wage is taken from the Workforce Needs Assessment survey data.

Appendix B

Reported Payroll Expansion

The Reported Payroll Expansion map shows the relative intensity of plans by employers to expand their workforce in each county, normalized by the total employment of the county. The darker the shade of blue, the greater expected new hires relative to local employment.

Reported Payroll Reduction

The Reported Payroll Reduction map (above) shows the relative intensity of plans by employers to reduce their workforce in each county, normalized by the total employment of the county. The darker the shade of red, the greater expected reductions relative to local employment.
